Tailor your network requirements by connecting with the most suitable solution from Corning’s wide array of products.

# Trust your Network to Corning

Fiber is changing the way we apply technology and grow as a society. We’re working hard to connect the unconnected, because where fiber goes, prosperity follows. Corning, as a leading diversified technology company, has a rich legacy of over 170 years in innovating breakthrough technologies that significantly improve people’s lives. Our fiber optic product solutions have been the backbone for communication networks worldwide. To ensure successful deployments, you need the support from trusted partners like Corning for easy-to-use, end-to-end passive optical solutions.

We have included product information and a list of tools and resources to help you do the job right the first time.

**Together we can connect the unconnected.**

# Bring Broadband Home

Whether you're an experienced network operator or tackling broadband for the first time, we'll meet you where you are to create a high-quality, cost-effective, fiber-to-the-home solution that's right for you today and scalable for tomorrow. Reliable, high-speed broadband is so much more than a network. It's opportunity. Access. Convenience. The internet allows your neighbors the freedom to live where they want while having the resources they need to live their best life. Discover how Corning can help at [www.corning.com/community-broadband](http://www.corning.com/community-broadband)

## Make Us Your Resource

Put the knowledge and experience of the leading manufacturer of fiber optic cable to work for you. We regularly offer real time and on-demand webinars on a wide array of educational topics through See the Light® seminars: [www.corning.com/seethelight](http://www.corning.com/seethelight). Corning's Community Broadband site is a resource designed to help you plan and deploy a fiber broadband network in your locality, ensuring reliable and high-speed fiber broadband access to all. Whether you're an experienced network operator or exploring network options for the first time, the site provides guidance on creating and managing a plan to implementing a network in your community. With the goal to Bring Broadband Home, Corning is dedicated to making it easier for everyone to access quality fiber broadband.

[www.corning.com/community-broadband.html](http://www.corning.com/community-broadband.html)

## Deployment Scenario Analysis

When it comes to deploying optical infrastructure, you have architecture and deployment options – each with advantages and costs. In this complimentary one-on-one session, we will talk through the variables for your network, including distance between homes and local labor rates. Your takeaway will be the per-home-passed price tag and start-to-finish timeline for the various deployment options you're considering.

[www.corning.com/fiber-to-the-premise/worldwide/en/home/products/bringing-broadband-home.html](http://www.corning.com/fiber-to-the-premise/worldwide/en/home/products/bringing-broadband-home.html)

## Collaborative Ecosystem Approach

Whether it's your millionth deployment, or your first, we have comprehensive solutions for you. We have formed strategic relationships in every area to make your deployment choice a success, including system integrators, financiers, active equipment manufacturers, network operators, and more.

We're here. **We understand.**

# Central Office/Headend Solutions

## Connect to Network Transformation

The core of every network is the central office or headend (CO/HE). It's the foundation needed to support the demand for new connectivity, capacity, and speed. Faced with the significant challenges of meeting increased bandwidth demands and providing enhanced services, network operators are re-evaluating their inside plant strategy and realizing new business opportunities. Our hardware solutions simplify the design and deployment of your CO/HE, with versatile product families that offer industry-leading density and flexibility and provide the lowest total cost of ownership.

Visit us at [www.corning.com/central-office-design-guide](http://www.corning.com/central-office-design-guide)

## Central Office/Headend Solutions

While there is no “one-size-fits-all” approach to network future-readiness, we have the design experience coupled with versatile central office/headend offerings to create a scalable solution that optimizes the capabilities of your unique network.

### 1A Outdoor Transition Splice\*

- Optical Cross-Connect Cabinet
- SCF Splice Closure
- UCAO Splice Closure

### 1B Indoor/Outdoor Cable\*

- FREEDM® Loose Tube Riser Cable
- FREEDM Ribbon Cable

### 2A Indoor Transition Splice

- OSE Splice Enclosure

### 2B Indoor Cable\*

- Ribbon Riser Indoor
- FREEDM SST-Ultra Ribbon Riser

### 3A Medium/High-Density Fiber Distribution

- Centrix™ System

### 3B Low/Medium-Density Fiber Distribution

- Centrix System

### 4 Cable Assembly

- Simplex Cable Assembly
- Duplex Cable Assembly

Medium/High-Density Fiber Distribution (continued)	
<b>Centrix™ Frames and Housings</b> 	
CTX-SA-FRAME-7	Centrix Standard Frame, Rear Access, jumper manager on left side, cable manager on right side
CTX-FA-FRAME-7	Centrix Standard Frame, Front Access, jumper manager on left side, cable manager on right side
CTX-S4U	Centrix Housing, 4U, 12 cassette positions empty
CTX-S2U	Centrix Housing, 2U, six cassette positions empty
CTX-S1U	Centrix Housing, 1U, three cassette positions empty
CTX-E4U	Centrix Enclosed Housing, 4U, 19- and 23-in rack mount, 12 cassette positions empty
<b>Centrix Stubbed Housings</b>	
CX1483124BS-CF001B	Centrix Stubbed 1U Housing, 48F, LC duplex adapters, single-mode (OS2), APC, 24F cassettes, 31 m FREEDM® riser ribbon indoor cable, top right (standard) cable entry
CX1726124A9-C7001B	Centrix Stubbed 1U Housing, 72F, LC duplex adapters, single-mode (OS2), UPC, 24F cassettes, 61 m ribbon riser indoor cable, top right (standard) cable entry
CX2E43124B3-CF001B	Centrix Stubbed 2U Housing, 144F, LC duplex adapters, single-mode (OS2), APC, 24F cassettes, 31 m FREEDM riser cable, top right (standard) cable entry
CX2M69236A9-C7001B	Centrix Stubbed 2U Housing, 216F, LC duplex adapters, single-mode (OS2), UPC, 36F cassettes, 92 m ribbon riser indoor cable, top right (standard) cable entry
CX4U831246C-UF001B	Centrix Stubbed 4U Housing, 288F, SC simplex adapters, single-mode (OS2), UPC, 24F cassettes, 31 m FREEDM riser cable, top right (standard) cable entry
CX4U831246C-UF001B	Centrix Stubbed 4U Housing, 288F, SC simplex adapters, single-mode (OS2), UPC, 24F cassettes, 31 m FREEDM riser cable, top right (standard) cable entry
CX8CE7636B3-V7001B	Centrix Stubbed 8U Housing, 864F, LC duplex adapters, single-mode (OS2), APC, 36F cassettes, 76 m UltraRibbon™ riser indoor cable, top right (standard) cable entry
CX8CE7636A9-VF001B	Centrix Stubbed 8U Housing, 864F, LC duplex adapters, single-mode (OS2), UPC, 36F cassettes, 76 m FREEDM UltraRibbon riser indoor cable, top right (standard) cable entry
<b>Centrix Accessories</b> 	
CTX-KIT-4RU-19CLP	Centrix 4U Housing Mounting Bracket Kit for 19-in frame
CTX-KIT-4RU-23CLP	Centrix 4U Housing Mounting Bracket Kit for 23-in frame
CTX-KIT-4RU-23HUB	Centrix 4U Housing Routing Hub Kit for 4U in a 23-in frame
CTX-KIT-2RU-19CLP	Centrix 2U Housing Mounting Bracket Kit for 19-in frame
CTX-KIT-2RU-23CLP	Centrix 2U Housing Mounting Bracket Kit for 23-in frame
CTX-KIT-1RU-19CLP	Centrix 1U Housing Mounting Bracket Kit for 19-in frame
CTX-KIT-1RU-23CLP	Centrix 1U Housing Mounting Bracket Kit for 23-in frame
CTX-KIT-RT-DH	Centrix Right-Hand Jumper Routing Waterfall Kit (Qty: 12)
CTX-WORKSHELF (optional)	Centrix Frame-Mounted Workshelf
CTX-SERVICEBKT (optional)	Centrix Cassette Service Bracket
PF1-PK-SA	Rear Cable Access Frame Isolation Ground Pad Kit
PF1-PK-FA	Front Cable Access Frame Isolation Pad
CTX-KIT-RT-DH	Centrix Cassette Kit for right-hand jumper routing (12 per pack)
CTX-KIT-S4U-MTP-SR	Centrix Rear Access Frame Rear-Mounted MTP® Trunk Strain-Relief Bracket
CTX-LABEL-432KIT	Centrix 432-Fiber Label Kit
CTX-LABEL-864KIT	Centrix 864-Fiber Label Kit
CTX-LABEL-1728KIT	Centrix 1,728-Fiber Label Kit
CTXCXSS36	Centrix Splice-Through Cassette, 36F, ribbon

### Medium/High-Density Fiber Distribution

#### Centrix™ Trunks

Z9090E4GPNDPxxxF	EDGE™ MTP® PRO Trunk, single-mode (OS2), 144F, non-pinned MTP PRO connector with push-pull boot to non-pinned MTP PRO connector with push-pull boot, non-armored, TIA-568 Standard Type-A Polarity, no pulling grip, xxx ft
G9090E4GPNDPxxxF	EDGE MTP PRO Trunk, single-mode (OS2), 144F, non-pinned MTP PRO connector with push-pull boot to non-pinned MTP PRO connector with push-pull boot, non-armored, TIA-568 Standard Type-A Polarity, pulling grip on first end only, xxx ft

3B

### Medium/High-Density Fiber Distribution (continued)

#### Centrix Pigtailed Splice Cassettes

CTXCPP36-B3-2RH000	Centrix Splice Cassette with 36 LC APC adapters and MIC® 250 µm standard single-mode pigtails
CTXCPP36-B3-2RJ000	Centrix Splice Cassette with 36 LC APC adapters and single-mode pigtails, ribbon
CTXCPP36-A9-2RH000	Centrix Splice Cassette with 36 LC UPC adapters and MIC 250 µm standard single-mode pigtails
CTXCPP24-6C-2RJ000	Centrix Splice Cassette with 24 SC APC adapters and single-mode pigtails, ribbon

#### Centrix Modules, Splitters, MTP, Patch, and WDM Modules

CTXCMR00-B3-SP1132	Centrix Splitter Cassette, One 1x32 splitter, LC APC connectors
CTXCMR00-A9-SP1132	Centrix Splitter Cassette, One 1x32 splitter, LC UPC (OS2)
CTXCMR00-B3-SP1102	Centrix Splitter Cassette, One 1x2 splitter, LC APC (OS2)
CTXCMR00-B3-SP1104	Centrix Splitter Cassette, Four 1x4 splitters, LC APC (OS2)
CTXCMR00-B3-SP1108	Centrix Splitter Cassette, One 1x8 splitter, LC APC (OS2)
CTXCMR00-B3-SP1116	Centrix Splitter Cassette, One 1x16 splitter, LC APC (OS2)
CTXCMR00-B3-SPT102	Centrix Splitter Cassette, Twelve 1x2 splitters, LC APC, (OS2)
CTXCMR00-B3-SP2116	Centrix Splitter Cassette, Two 1x16 splitters, LC APC (OS2)
CTX2402246C-D9892R	Centrix Cassette with 24 SC APC adapters which terminate with two 2-m MTP adapter leg(s), front right access
CTX24AD-932QLR	Centrix Module with 24-port MM LC UPC 2 pinned MTP adapters, OM4, front left access
CTX24B3-892RRR	Centrix Module with 24-port LC APC 2 pinned MTP adapters, OS2, front right access
CTX36A9-893RBR	Centrix Module with 36-port LC UPC 3 pinned MTP adapters, OS2, rear access
CTX36B3-893RBR	Centrix Module with 36-port LC APC 3 pinned MTP adapters, OS2, rear access
CTXCA36-A9B	Centrix Patch Panel Cassette with 36-port LC UPC rear entry
CTXCA36-B3B	Centrix Patch Panel Cassette with 36-port LC APC rear entry
CTXCAE4-90B	Centrix Patch Panel Cassette, 12 port, 144F, single-mode, MTP, rear entry
CTXCAE4-90R	Centrix Patch Panel Cassette, 12 port, 144F, single-mode, MTP, front right entry
CTXXB3B3G0X00000-NC	Centrix CEx LCA/LCA GPON/XGSPON 12 Devices
CTXDB3B3C116200-DU1	Centrix DWDM LCA/LCA Dual 100GHZ spacing 16CH
CTX24A9-E73RRR	Centrix MTP Enabled Module, 24F, three 8-fiber front MTPs, 24 LC UPC connectors
CTX24B3-892RBR	Centrix MTP Enabled Module, 24F, two 12-fiber rear MTPs, 24 LC APC connectors

Centrix Splice Cassette, 36 LC APC Adapters

Centrix MTP Enabled Module, 24 LC APC Adapters, 2 Rear MTPs

Centrix Splitter Cassette, One 1x32, LC APC Connectors

## Central Office/Headend Solutions

3B

Low/Medium-Density Fiber Distribution	
<b>Eclipse® Frames and Housings</b> 	
ECL-BAY-7-Z4	Eclipse Frame, 7 ft with top and bottom shelves, 19-in wide
UDF-BAY-19E-07-075	Eclipse Unequal flange, 19-in frame, 7 ft high
UDF-BAY-23E-07-Z75	Eclipse Unequal flange, 23-in frame, 7 ft high
ECL-C4U	Eclipse 4 Rack Unit, holds 12 Eclipse connector panels, up to 144F, empty
ECL-D4U	Eclipse 4 Rack Unit, extended-depth connect-and-splice housing, empty
ECL-C2U	Eclipse 2 Rack Unit, holds four Eclipse connector panels, 48F, empty
ECL-C1U	Eclipse 1 Rack Unit, holds two Eclipse connector panels, 24F, empty
ECL-S4U	Eclipse Splice Housing with capacity for (12) 0.2-in tall splice trays, empty
ECL-S4U-F	Eclipse Splice Housing with capacity for (6) 0.4-in tall splice trays, empty
<b>Eclipse Pigtailed Splice Housings</b> 	
ED4E4P12-D9-3RN6R0	Eclipse 4 Rack Unit, 144F Housing, 12 connectors per panel, SC APC, 900 µm 3-m tails, six SCF-ST-077 splice trays (OS2)
EC224P06-6C-3RJ2R0	Eclipse 2 Rack Unit, 24F Housing, 6 connectors per panel, SC APC, ribbon 3-m tails, two SCF-ST-077 splice trays (OS2)
EC124P12-D9-3RJ1R0	Eclipse 1 Rack Unit, 24F Housing, 12 connectors per panel, SC APC, ribbon 3-m tails, one SCF-ST-077 splice tray (OS2)
EC124P12-59-3RJ1R0	Eclipse 1 Rack Unit, 16F Housing, 8 connectors per panel, SC UPC, 900 µm 3-m tails, one SCF-ST-077 splice tray (OS2)
<b>Eclipse Stubbed Housings</b> 	
ECLE41612D9-U4001B	Eclipse 4 Rack Unit, 144F Housing, 12 connectors per panel, SC APC, 16-m stub, ALTOS® loose tube, gel free (OS2)
EC248161259-C7001B	Eclipse 2 Rack Unit, 24F Housing, 12 connectors per panel, SC UPC, 16-m stub, ribbon riser cable (OS2)
EC248161259-C7001B	Eclipse 2 Rack Unit, 48F Housing, 12 connectors per panel, SC UPC, 16-m stub, ribbon riser cable (OS2)
EC1241612D9-C7001B	Eclipse 1 Rack Unit, 24F Housing, 12 connectors per panel, SC APC, 16-m stub, ribbon riser cable (OS2)
<b>Eclipse Connector Panels</b> 	
ECL-CP12-59	Eclipse 12 connectors per panel, SC UPC (OS2)
ECL-CP12-D9	Eclipse 12 connectors per panel, SC APC (OS2)
ECL-CP08-59	Eclipse 8 connectors per panel, SC UPC (OS2)
ECL-CL08-D9	Eclipse 8 connectors per panel, SC APC (OS2)
ECL-CP06-3C	Eclipse 6 connectors per panel, SC UPC (OS2)
ECL-CP06-6C	Eclipse 6 connectors per panel, SC APC (OS2)

Other connector options exist for the Eclipse family. Please contact Corning Customer Care at 800-743-2671 for additional part numbers or visit [www.corning.com/opcomm](http://www.corning.com/opcomm)

## Central Office/Headend Solutions

Designed to streamline inventory management, the Corning Jumper in a Box (JIAB) solution is now available with data center-friendly corrugated plastic. This JIAB option offer a stackable, standard size box that contains up to 70 jumpers. All the core product information is clearly visible on the box, including part number, fiber mode, and jumper length.

- **Eco-friendly packaging**  
Cardboard or environmentally friendly corrugated plastic
- **Bags are connected with perforated seam**  
Easy pull-and-tear process to access individual jumpers
- **Product labels placed on the front of the box**  
Quick visual identification of correct jumper length and type
- **Reorder notice placed towards end of jumper bags**  
Reduces risk of running out of product
- **Reduces packaging on jumper orders**  
Less waste and less time required to unpack product
- **Sequential numbers placed on individual jumper bags**  
Improves inventory management
- **Core fiber modes and connector types available with JIAB**  
This solution can be used across application spaces including data center, central office, and headend sites
- **State-of-the-art manufacturing processes**  
Advanced technology results in unsurpassed product consistency and quality

Visit [www.corning.com/jiab](http://www.corning.com/jiab) to learn more about our jumper in a box solutions.

Cable Assemblies	
Single-Fiber Jumper in a Box	
0202-SR2-x70-01M	LC UPC to LC UPC, 1.6 mm outer cable diameter, single-mode (OS2), 70 jumpers in a box, 1 m length
0202-SR2-x70-03M	LC UPC to LC UPC, 1.6 mm outer cable diameter, single-mode (OS2), 70 jumpers in a box, 3 m length
0258-SR2-x70-01M	LC UPC to SC UPC, 1.6 mm outer cable diameter, single-mode (OS2), 70 jumpers in a box, 1 m length
0258-SR2-x70-03M	LC UPC to SC UPC, 1.6 mm outer cable diameter, single-mode (OS2), 70 jumpers in a box, 3 m length
2244-SR2-x70-01M	LC APC to SC APC, 1.6 mm outer cable diameter, single-mode (OS2), 70 jumpers in a box, 1 m length
2244-SR2-x70-03M	LC APC to SC APC, 1.6 mm outer cable diameter, single-mode (OS2), 70 jumpers in a box, 3 m length
5858-SR2-x70-01M	SC UPC to SC UPC, 1.6 mm outer cable diameter, single-mode (OS2), 70 jumpers in a box, 1 m length
5858-SR2-x70-03M	SC UPC to SC UPC, 1.6 mm outer cable diameter, single-mode (OS2), 70 jumpers in a box, 3 m length
Two-Fiber Jumper in a Box	
0404-ZR2-x70-01M	LC UPC Duplex to LC UPC Duplex, 2.0 mm outer cable diameter, single-mode (OS2), 70 Jumpers in a Box, 1 m length
0404-ZR2-x50-03M	LC UPC Duplex to LC UPC Duplex, 2.0 mm outer cable diameter, single-mode (OS2), 50 Jumpers in a Box, 3 m length
0472-ZR2-x60-01M	LC UPC Duplex to SC UPC Duplex, 2.0 mm outer cable diameter, single-mode (OS2), 60 Jumpers in a Box, 1 m length
0472-ZR2-x50-03M	LC UPC Duplex to SC UPC Duplex, 2.0 mm outer cable diameter, single-mode (OS2), 50 Jumpers in a Box, 3 m length
1866-ZR2-x60-01M	LC APC Duplex to SC UPC Duplex, 2.0 mm outer cable diameter, single-mode (OS2), 60 Jumpers in a Box, 1 m length
1866-ZR2-x50-03M	LC APC Duplex to SC UPC Duplex, 2.0 mm outer cable diameter, single-mode (OS2), 50 Jumpers in a Box, 3 m length
4444-ZR2-x60-01M	SC APC Duplex to SC APC Duplex, 2.0 mm outer cable diameter, single-mode (OS2), 60 Jumpers in a Box, 1 m length
4444-ZR2-x50-03M	SC APC Duplex to SC APC Duplex, 2.0 mm outer cable diameter, single-mode (OS2), 50 Jumpers in a Box, 3 m length

Note: X = Use P for plastic or R for refill

## Connect to the Corning Advantage

We invented the first low-loss optical fiber over 54 years ago, igniting the critical spark that began a communications revolution and forever changed the world. And today, we continue to lead the industry in product quality and innovation. With designs for every environment, our innovative cables solve your unique application challenges, from congested duct space and environmental extremes, to mechanical forces and cable-entry concerns.

Visit us at [www.corning.com/cable-and-closure-solutions](http://www.corning.com/cable-and-closure-solutions)

# The Cable You Need – When You Need It.

## RPX® Ribbon Cable

Innovative solution that provides the ideal alternative for a variety of connectivity needs. Its unique, gel-free design helps eliminate the time and labor associated with cleaning, and the one-step cable access system significantly simplifies prep work. This cable features a central cavity containing a ribbon stack of up to 144 fibers, which can easily be separated into 12-fiber ribbons by hand.

# The Cable You Need – When You Need It.

Visit [www.corning.com/rpx](http://www.corning.com/rpx) to learn more about our cabling solution for emerging network requirements.

# Legacy Copper

## Connect to Simplified Migration

When subscriber density or the funds available for investment do not justify a complete fiber overbuild, your existing copper twisted-pair infrastructure can still deliver triple-play service. Your long-term plans may include an all-fiber infrastructure, but for now if it makes sense to gradually upgrade your existing copper network, we can help. We have the products and services you need to migrate your network toward next-generation optical solutions that will meet your customers' high-capacity bandwidth demands.

# Built tough for long-term connections.

## Corning® Presslok™ Connectors

The same great connector you've come to rely on with a new brand name, Corning Presslok Connectors. With the Presslok series of tools and connectors, service providers can meet the demand for enhanced customer services such as high-speed internet, video-on-demand, and video conferencing. Presslok connectors also offer full wire-range capability, increased port size to accommodate up to 2.08 mm (0.082 in) insulation sizes, and solvent-resistant plastic construction.

As new technologies migrate into the local loop, the importance of reliable connections in the embedded plant has increased exponentially. Each connection is a potential point of failure in high-bandwidth applications, which could require additional time and expense for a technician to repair. That is where the full line of Presslok connectors can really make a difference.

# Hybrid Fiber Coax

## Connect to Choices

In hybrid fiber coax (HFC), the connectivity choices you make can dramatically impact your network's bottom line starting on day one. Our support in the cable TV segment acknowledges the array of architectures, considers that each deployment presents its own challenges and opportunities, and addresses the operator's needs through a portfolio of products and engineering support designed specifically for MSO.

# Do more with your fiber xWDM technologies

Wavelength division multiplexing (WDM) is a powerful technology that uses multiple wavelengths, or colors, of light to send multiple signals through a single fiber. This allows you to increase the density of your network to meet surging demand without expanding the existing physical infrastructure, saving you time and money.

When you're considering a WDM installation, precise planning and top-quality products are critical. We can help you successfully navigate the fast-evolving WDM landscape and do more with fiber in your network.

Visit [www.corning.com/wdm](http://www.corning.com/wdm) to learn more about how Corning can help with your xWDM needs.

# FTTH – Single-Family Units

## Connect to World-Class FTTH Innovation

Whether your deployment is to an SFU or MDU, you can count on our fiber to the home (FTTH) expertise. With 20 years experience and over 100 million homes passed worldwide (over 45 million homes connected with hardened connectors), we've set the standard for innovative, field-proven FTTH solutions. Our portfolio of products and engineering support is designed to address your specific challenges from speed of deployment, labor and cost considerations, performance requirements, future readiness, and more.

# Go Smaller, Faster, Simpler – Anywhere.

**Evolv<sup>®</sup> Solution with Pushlok<sup>®</sup> Technology – Leading through Innovation. The Pushlok hardened connector technology is the key component to enabling smaller terminals and drop for FTTx networks.**

Smaller and smarter configurations save time, space, and money. Continuous innovations allow everyone to Evolv their networks.

**The preconn evolution continues...**

Innovation is in our DNA. Visit [www.corning.com/go](http://www.corning.com/go) for details

# FTTH – Network Architecture

Rural communities have a historic opportunity to lay the foundation for a broadband infrastructure that can deliver high-quality broadband to everyone for generations to come. Building the right broadband networks now will have a long-reaching impact on your community. As communities build out broadband infrastructure, choosing the right architecture is key to ensuring seamless connectivity. There are three primary broadband architecture types to consider: distributed split, centralized split, and optical tap.

As you make decisions about your community's network, there are a range of fiber network architecture options from which to choose. Leverage the resources below to make the best decision possible.

### Centralized Split

A centralized split architecture is where most of the network equipment is in a central hub, which then distributes the signal to different locations. It is known for its simplicity and ease of maintenance.

[Click Here to Download](#)

### Distributed Split

A distributed split architecture involves spreading out the network equipment across various locations, which helps reduce the physical volume of products in the field. It is known for its flexibility and scalability, making it a popular choice for expanding networks in rural areas.

[Click Here to Download](#)

### Distributed Tap/Optical Tap

An optical tap architecture uses a unique approach through the use of a single fiber. It is designed to split and distribute the signal at the same time, reducing the amount of fiber required. It is an efficient system that minimizes signal loss leading to better performance.

Featuring a single buffer tube containing 1 to 24 loose fibers. Parallel strength members make this cable robust and ideal for aerial or direct-buried outdoor installations. [View Specification Sheet](#)

**ROC Drop Dielectric 001 F**  
A single-fiber drop cable suitable for aerial, duct, or direct-buried outdoor installations. Available with Corning's innovative FastAccess Technology which makes opening the cable easier and faster. [View Specification Sheet](#)

## Preconnectorized Drop and Terminal Packaging at a Glance

Product Line	Suffix	Packaging Type	Location	Connector Payoff	Length Default to Reel
Drop Pigtail with Hardened Connector Part Number Prefix: OOD1 Pushlok® Pigtail or D1D1 Pushlok Jumper	Base PN Only	Bulk	Inside Coil	Last	1,501 ft +
	-P	Individual	Inside Coil	Last	651 ft +
	-Z	Bulk (reverse spool*)	Outside Coil	First	1,501 ft +
	-PZ	Individual (reverse spool)	Outside Coil	First	651 ft +
Drop Hybrid Cable Assembly with Hardened Connector Part Number Prefix: D144 Pushlok/SC APC	Base PN Only	Bulk	Outside Coil	First	1,501 ft +
	-P	Individual	Outside Coil	First	651 ft +
Z version has hardened conn on the inside For assemblies with a grip installed, the grip is always on the outside of the coil.					
SC APC Drop Cable Assemblies Part Number Prefix: 0044 SC APC Pigtail or 4444 SC APC/SC APC	-P	Individual	Inside Coil	Last	1,501 ft +
	SC APC drop assemblies or pigtails default to individual packaging. Bulk packaging for Base PN configurations anticipated in 2022.				

### Drops Packaging

Individually packaged PNs not shipped on reels come 1 to a box. Bulk packaging will contain multiple drops per box based on varying quantity, cable type, and length of assembly.

\*For reverse-spool packaging, the hardened connector or terminal is located on the outside of the coil and pays off first.

Product Line	Suffix	Packaging Type	Terminal Location	Terminal Payoff	Length Default to Reel
Legacy MultiPorts (MOB) or Evolv® Terminals (DM)	Base PN Only (Legacy) B (Evolv Terminals)	Bulk	Inside Coil	Last	350 ft +
	-P	Individual	Inside Coil	Last	500 ft +
	-Z	Individual (reverse spool)	Outside Coil	First	500 ft +
	No reverse spool bulk packaging option for terminals.				

# FTTH – Multidwelling Units

## Connect to World-Class FTTH Innovation

When it comes to multidwelling units (MDUs), there's no one-size-fits-all answer. You need a customized solution and a collaborator with the expertise to simplify your challenges, so you can focus on delivering the services and applications that your subscribers expect. Choose a supplier that knows your environment and has manufacturing expertise that can help you choose flexible, simplified product sets. We can help.

To learn more, visit us at [www.corning.com/mdu](http://www.corning.com/mdu)

# Clearly Faster. Clearly Easier. Clearly Better.

## Corning® Clear Track Hallway Fiber Pathways

The Clear Track Hallway Fiber Pathway is the virtually invisible way to deliver ultra-high-speed gigabit broadband to multidwelling units (MDUs). It adapts micro-replication technology for the multifiber needs of MDU hallways to enable fast and easy installation with minimal disruption for tenants. Our Clear Track Fiber Pathways portfolio offers a clear advantage!

Learn more about this virtually invisible way to deliver ultra high-speed gigabit broadband by visiting [www.corning.com/cleartrack](http://www.corning.com/cleartrack).

## FTTH – Multidwelling Units – Network Architecture

Whether you're connecting subscribers through the inside or outside surface of an MDU, we have a solution for the trickiest pathways and access parameters. Below you'll see a sampling of the MDU layouts we have experienced and a few examples of how we've supported them over the past 10-plus years.

### 1 MDU Entrance

- OSP LCP
- Distribution
- Building Entrance

### 2 Riser Access

- RPDpass® Riser
- FlexNAP™ System

### 3 Floor Access

- Low-Profile Terminal
- Fiber Distribution Terminal

Outdoor Local Convergence Point	
PAG-B3-BBU4SU46C-000XFA	PAC Series, outdoor cabinet, pad mount without toning, 144F, 6-in skirt with 24-fiber feeder, 24-fiber pass-through, ALTOS <sup>®</sup> dielectric cable feeder and distribution cable, 31-m stubs, SC APC, no splitters, almond colored
PAG-B3-BAU4SU4P-000XFA	PAC Series, outdoor cabinet, pad mount without toning, 144F, 6-in skirt with 24-fiber feeder, no pass-through, ALTOS dielectric cable feeder and distribution cable, 31-m stubs, SC APC, no splitters, almond colored
UMB1CC6CZ6C21132	Gen III Splitter Module, 1x32
WMC4CC6CA6C11132	LS Splitter Module, 1x32
Distribution	
For more information about our Outside Plant and Indoor/Outdoor Cables, please refer to the Optical Cable section.	
Building Entrance	
JMXPS1000BBO00BB00	CE Series Indoor Cabinet, 72F, wall mountable, pigtailed and splice chamber for spliced-in feeder and distribution
JCWPS2000BB0007700	CE Series Indoor Cabinet, 288F, wall mountable, pigtailed for spliced-in feeder, MTP <sup>®</sup> -enabled distribution
JFWPS2000BB0007700	CE Series Indoor Cabinet, 864F, wall mountable, pigtailed for spliced-in feeder, MTP-enabled distribution
DDWPS2100AA108C700	LS Series Indoor Cabinet, 144F, wall mountable, 24F feeder and 12F pass-through pigtailed, 144F ribbon riser distribution, 8 m
DAWPS4300AA108Q700	LS Series Indoor Cabinet, 432F, wall mountable, 48F feeder and 36F pass-through pigtailed, 432F ribbon riser distribution, 8 m
BDWP131CF1C08C7S00	Gen III Series Indoor Cabinet, 144F, wall mountable, 12F I/O ribbon riser feeder 31 m, 144F ribbon riser distribution, 8 m
MDU0431326C-UFO0A1	MDU Splitter Terminal, 1x32 SC APC, FREEDM <sup>®</sup> loose tube input 31 m, pigtailed for spliced-in drops
MDU1231126C-C4CG2P	MDU Terminal, 12 ports SC APC, OSP ribbon input 31 m, pigtailed for spliced-in drops
MDU0000126C-00M22Q	MDU Terminal, 12 ports SC APC, OptiTip <sup>®</sup> pinned input, direct-connect drops
MDU0000126C-AACG2P	MDU Terminal, 12 ports SC APC, internal pigtailed for spliced-in input and spliced-in drops
MDU2431246C-C4CG2P	MDU Terminal, 24 ports SC APC, OSP ribbon input 31 m, pigtailed for spliced-in drops
MDU0000246C-AACG2P	MDU Terminal, 24 ports SC APC, pigtailed for spliced-in input and spliced-in drops
MDU4831486C-C4CG2P	MDU Terminal, 48 ports SC APC, OSP ribbon input 31 m, pigtailed for spliced-in drops
LPT1231126C-B4M12Q	Low-Profile Terminal, 12 ports SC APC, SST-Drop <sup>™</sup> with OptiTip input 100 ft, direct-connect drops
LPT-PLAS-SKRT-BRKT-FR	Indoor/outdoor plastic skirt and mounting bracket kit
MDU-PLAS-SKRT-BRKT-FR	Indoor/outdoor plastic skirt and mounting bracket kit

2

Riser Access	
RRB131312UPNM6SxxxF	RPDpass <sup>®</sup> Riser, basement (pull up), 12F MTP <sup>®</sup> at basement, 2 x 6F MTP connectors at terminal, xxx ft
BLD-P8896EV4200FP	FlexNAP <sup>™</sup> System, facade cable, 96F, eight 8-fiber taps, 200-ft tail

Note: For bulk cable options, please visit the optical cable section or [www.corning.com](http://www.corning.com).

OptiSnap Field-Installable Connector Toolkit

No Polish Connector + (NPC+)

6

Field-Installable Connector	
TKT-OPTISNAP-CF	OptiSnap™ Field-Installable Connector Toolkit, with flat cleaver
OSNP-SCA-900-Z	OptiSnap® Connector, SC APC, 25-piece organizer pack, single-mode (OS2), 900 µm
OSNP-SCU-900-Z	OptiSnap Connector, SC UPC, 25-piece organizer pack, single-mode (OS2), 900 µm
NPCP-SCU-48	NPC+ (No Polish Connector), SC UPC, 48 piece carton, single-mode (OS2), 250 µm/900 µm (no installation tool required)
NPCP-SCA-48	NPC+ (No Polish Connector), SC APC, 48 piece carton, eight 6-piece subpacks, single-mode (OS2), 250 µm/900 µm
TKT-NPCP-FBC007	Fiber Termination Toolkit, flat cleaver FBC-007 and accessories in carrying case
TKT-FIOT-ROC-CF	Field-Installable OptiTap™ Toolkit for ROC™ cable (Also available in an SST version)
TKT-FIPL	Pushlock Field-Installable Toolkit for ROC cable
OSNP-FIOT-ROC-Z	Field-Installable OptiSnap Connector for ROC cable, SC APC, 25-piece pack (Also available in an SST version)
FIPL-Z	Pushlock Field-Installable Connector for ROC cable, SC APC, 25-piece pack
80610755896	Corning® Fiblok® II Universal Optical Fiber Splice for 250 µm and 900 µm fiber (assembly tool and toolkit needed for install)
80610581870	Fiblok Assembly Tool

Fiblok® II Optical Fiber Splice 2529

Translucent design is easily attached to a variety of wall surfaces and is available with an array of preconnectorization options.

# Wireless Convergence

Wireless networks are becoming more like traditional FTTH networks where radios and small cells are reaching deep into neighborhoods and towns. Overlaying these services onto a traditional FTTH network requires planning and a few additions to your normal product lineup. See below pages for some typical equipment deployment scenarios or rely on our team of experts to help find the best fit solution for your convergence needs.

# Optical connectivity: the backbone of 5G

## Small Cell Product Solutions

While radio head manufacturers require differing hardened connector types, most of the components used are similar. LC connectors and xWDM devices are critical to the success of any converged wireless network. You can set up assemblies to match the specific requirements of any deployment environment and radio head maker's instructions to provide either fiber only or combined (fiber and power) connectivity. xWDM devices are becoming more critical to combine wireless and wireline traffic via coexistence modules. Additionally, DWDM is being deployed to optimize fiber utilization in some small cell systems. There are numerous options depending on your deployment needs, and only a small fraction of the options are displayed in the following pages.

For more information on our small cell product offerings, visit [www.corning.com/ftp](http://www.corning.com/ftp).

## Macro Towers

Macro sites have evolved to accommodate the landscape over which they serve. Stand-alone towers, monopoles, rooftop and even water tower installations have supported cellular and microwave backhaul applications as they have progressed through LTE and are now involved in 5G deployments.

## Small Cells

Small cells have increased as wireless demands grow beyond the reach of the macros. The smaller form factors and shorter reach necessitates they be closer to users – nestled in and amongst street furniture, on buildings or hidden away in lamp posts.

T10202EBZD1XxxxF-P	Multifiber Pushlok (female) to LC duplex drop cable assembly, 2-fiber, I/O FREEDM® cable, xxx ft

Duplex Pushlok to LC Duplex

The Corning small cell drop assemblies are rugged, self-supported, and crush-resistant.

The dual Pushlok to LC duplex assemblies, compatible with our Evolv terminals, allow for a 2-fiber connection from the terminal to the radio, removing the requirement for additional hardware. Two options with differing furcation lengths on the LC Duplex end allow for compatibility with either Ericsson 2203 and 2205 radios or Ericsson RRUS radios, as well as hardware utilizing OCTIS and JonHon field-installable connectors with a uniboot design.

# Programs and Resources

You know your network – and the importance of its reliability – better than anyone. That’s why we offer tailored support and resources to help you get the job done right the first time, every time. From design to deployment (and everything in between), you can count on Corning to expand your expertise and cost-effectively transform your network. For more information, check out our programs page at [www.corning.com/loyalty-programs](http://www.corning.com/loyalty-programs).

# See the Light<sup>®</sup> Fiber Optic Training

So you can be successful in this time of rapid network transformation, we offer an array of training opportunities on the latest applications and products. For the most up-to-date industry knowledge – whether training in-person or at your desk – we have you covered. Visit [www.corning.com/opcomm/training](http://www.corning.com/opcomm/training).

## Webinar Series

Stay current with the See the Light<sup>®</sup> webinar offerings, which focus on specific topics impacting networks today. Participate in one-hour live webinars to connect in real-time with Corning experts or catch up on the webinar recordings at your convenience. Visit [www.corning.com/opcomm/webinars](http://www.corning.com/opcomm/webinars).

## Instructor-Led Classes and Seminars

If it's classroom training that you feel is most valuable, our instructor-led courses are for you. We cover product and solution introductions, in-depth installation training, and network design and specification. These classes range from two hours to multiday hands-on sessions, each led by experts who understand the needs of industry professionals. To view our hands-on seminar schedule visit [www.corning.com/opcomm/seminars](http://www.corning.com/opcomm/seminars). To view our multiday design and installation training courses, visit [www.corning.com/optical-communications/worldwide/en/home/training-and-events/training-programs/fiber-optic-training.html](http://www.corning.com/optical-communications/worldwide/en/home/training-and-events/training-programs/fiber-optic-training.html)

## Online Learning

We understand that classroom training is not always an option. To make learning opportunities available when and where you need them you can access See the Light Learning Central, our on-demand learning platform. To gain access to See the Light Learning Central, email [stlinfo@corning.com](mailto:stlinfo@corning.com).

## Industry-Approved Courses

Many of our courses have been approved by industry organizations, making it easy for you to continue your education while earning industry accreditations. Accreditation information can be found within the individual course listings. Visit [www.corning.com/opcomm/training](http://www.corning.com/opcomm/training) for more information or to sign-up to receive email updates around our trainings offerings. If you have any questions, email us at [stlinfo@corning.com](mailto:stlinfo@corning.com).

# Authorized Distributors

We have fostered long-term relationships with authorized distributors who stock our products and support your needs including training, customer requirements assessments, logistics, and equipment. Whether you are an end user, contractor, or installer, connect with our authorized distributors and technical support teams about Corning solutions today.

# Technical Support

Your customers and users expect reliable connectivity, and we know it takes more than products to deliver on those expectations. From us, you can expect collaborative global support for your network today to prepare it for emerging applications and services. Connect with our network professionals at any phase of your project to take advantage of their training, experience, and equipment for a cost-effective, high-quality result. Our experts offer design and training services, technical assistance, and customer support resources. You may be expanding your existing footprint, upgrading to an all-fiber network or looking to overlay wireless backhaul on your existing FTTH build – your business depends on good infrastructure decisions.
